

	1	Interview - Teilnehmer 7:
	2	Bevor das Interview beginnt, wird der Teilnehmer über die Studie debriefed und es werden nochmal alle Warnungen durchgezeigt.
	3	I: How did you generally perceive the warnings? Were they immediately noticeable?
..Inconspicuous	4	B: Maybe because of my previous experience as a working student, I'm already quite informed about phishing emails. Honestly, I didn't pay attention to the warnings much during this task.
..Inconspicuous	5	I: Can you explain why you think that was?
	6	B: I'm not sure if the warnings were part of the deception or not.
..Clarity and Legibility	7	I: Were there any elements in the warnings that particularly stood out to you?
	8	B: Not really, just that they were red. Red is a signal color for warnings. The yellow warning triangle that says 'Warning' and the large text field were the main things.
..Positive	9	I: About the effectiveness of the warnings—did you find some warnings more effective than others?
Attention Engagement	10	B: Yes, now in retrospect I found the warnings very effective, for example with these or with the bank. Or the large banners which were very large and drew attention.
	11	I: We had two versions for each warning, one with more details and one with less. Which one would you prefer?
..More Details	12	B: I prefer the one with more details because it clearly explains why the warning is there.
	13	I: About the design in general, how did you find the color and animations?
Attention Engagement	14	B: The use of red color definitely makes it very noticeable. And, for example, here the warning just stands by itself, which I think is better. When I did the task, I didn't even realize there was a warning there, and yes?
..Clarity and Legibility	15	B: And here it's also good because there's a comparison to the previous signature.
..Potential Improvements	16	B: No, maybe also here you could make a short one. Like as an addition to it.
	17	I: How do you find clickable elements in phishing warnings?
..Positive	18	B: Yes, definitely good.
	19	I: Has the study changed your awareness of phishing in any way? Anything new for you?
Novelties for Participants	20	B: There was something new. The greeting and signature had not occurred to me before.
	21	I: Do you have any suggestions for improving the design, colors, and animations?
..Potential Improvements	22	B: The design of the clickable banner can be improved so that it is more clear that it is safe to click. Yes, maybe that can be improved a bit. Otherwise, here at the bank (banner warning), I would say these large banners and the small one together would be better.

..Potential Improvements

23

B: Otherwise, I will take a quick look through them.

24

B: They should come in immediately and not after a second of delay.

25

B: And here I think it would also be cool if the banner stays on. (link hover)

26

I: How do you usually deal with suspicious emails?

27

B: Especially looking at the sender address. And other little unusual things.
